## Clean E-Bhubaneswar

### **What is e-waste?**

---

E-waste is a term for electrical and electronic devices that have become *unwanted, non-working or obsolete and have essentially reached the end of their useful life.*

### **Did you know?**

---

National legislation requires that e-waste is recycled properly and places the responsibility on consumers for making sure their e-waste is disposed of in the right manner.

Responsible recycling creates jobs, provides raw materials and reduces pollution. Yet, the large majority of e-waste is thrown away or disposed of improperly, making it harmful to the environment and human health.

## Easy, convenient and responsible recycling of e-waste for the residents of Bhubaneswar

The Bhubaneswar Municipal Corporation wants Bhubaneswar to lead the country in creating a smart, clean and green city.

### **What can you do?**

---

Do you have e-waste cluttering your home?  
Do you have a drawer full of old and broken mobile phones, chargers and other electronics?

Got E-Waste?

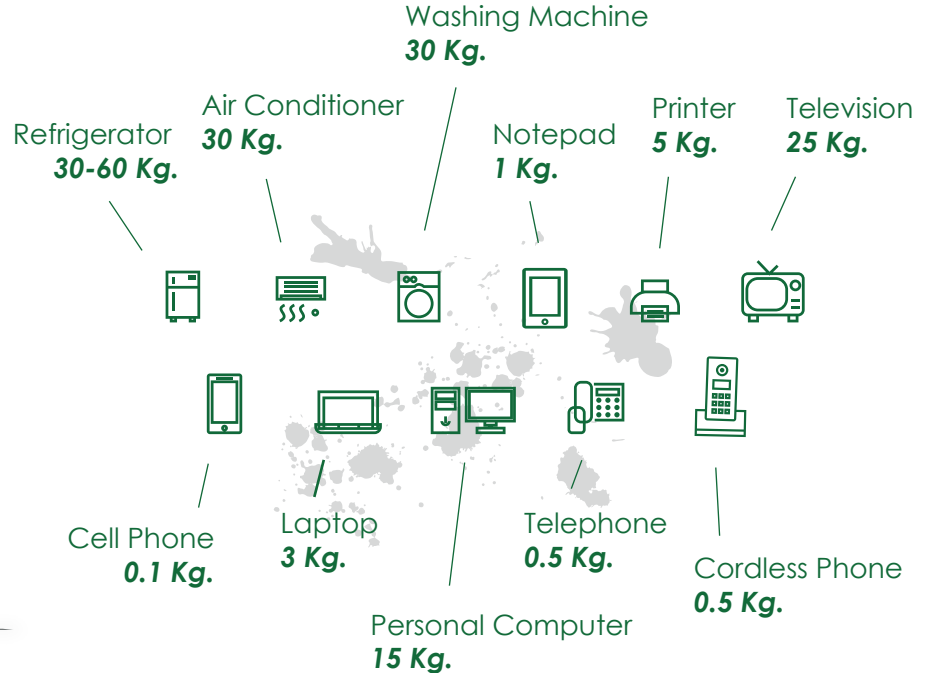

Give us a call - **18001202723**
