

## Webinar on Energy Storage EU - India

Thore Sekkenes,  
Program Director  
European Battery Alliance - EBA250

**EUROPEAN  
BATTERY  
ALLIANCE**

**EBA250**

## EIT InnoEnergy / EBA 250 European Battery value chain status

### Conclusions

**EUROPEAN  
BATTERY  
ALLIANCE**

**EBA250**

This cooperative ecosystem gathers the European Commission, interested EU countries, investment institutions and key industrial, innovation and academia stakeholders

EIT InnoEnergy has been trusted by the European Commission to drive forward and promote EBA250 activities, acting as network manager and project facilitator

**700+ members**

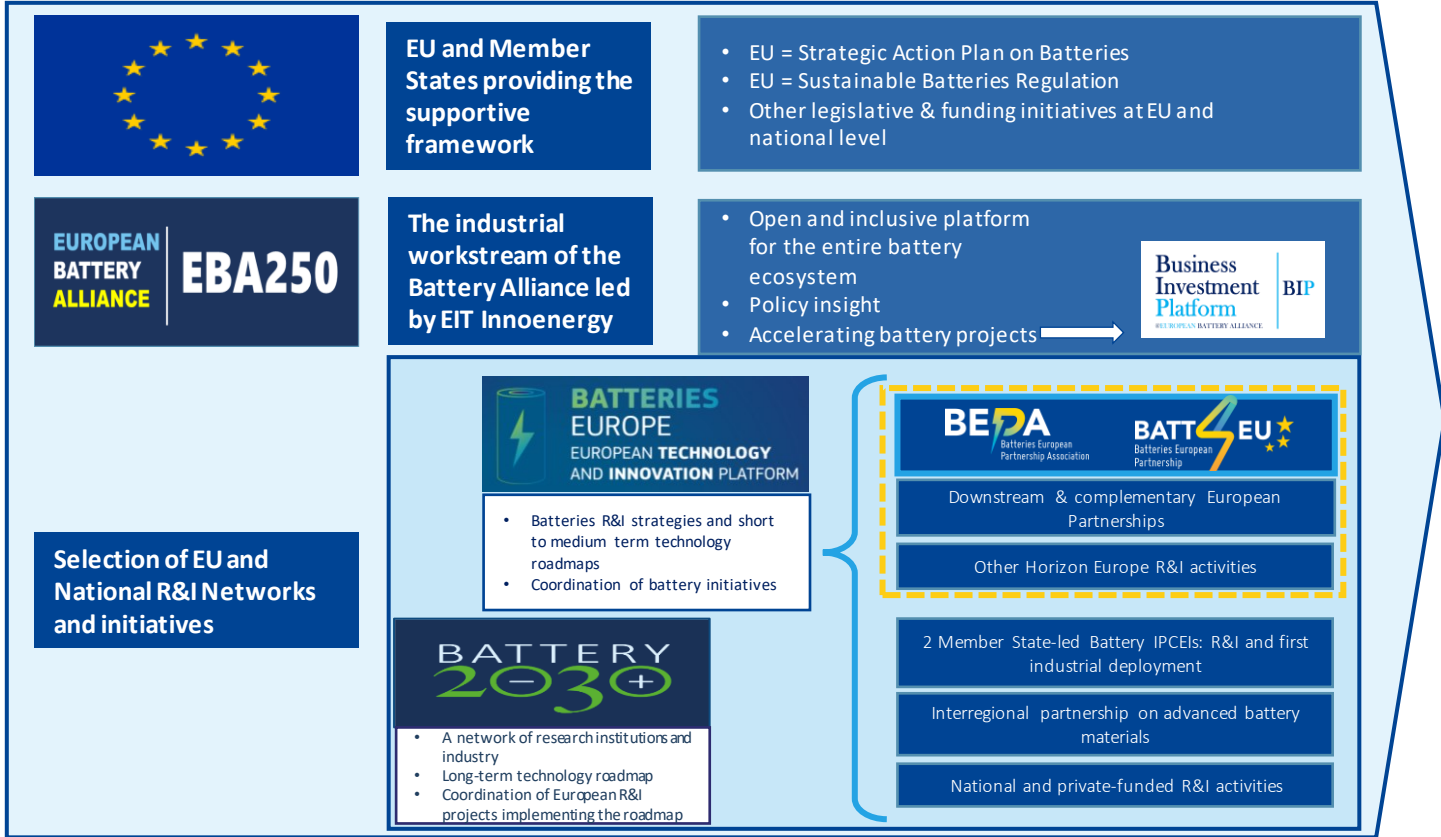

**30+** Research and associations active in large parts of the value chain

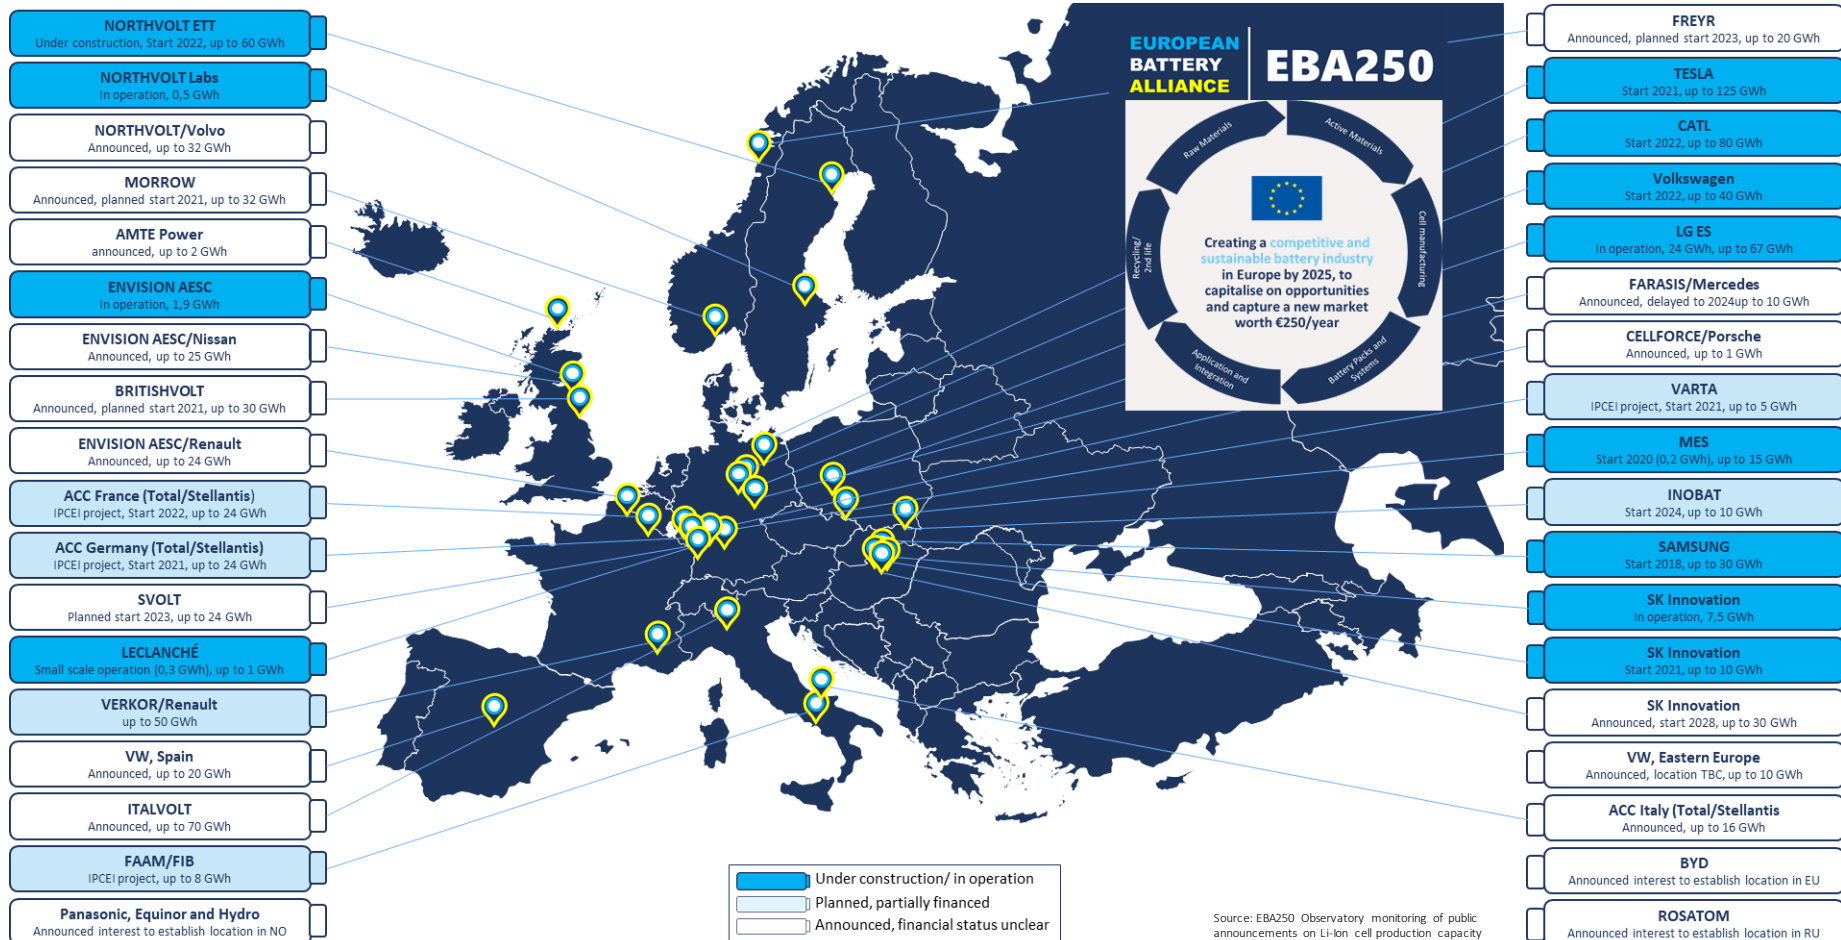

**10+** European Commission Services

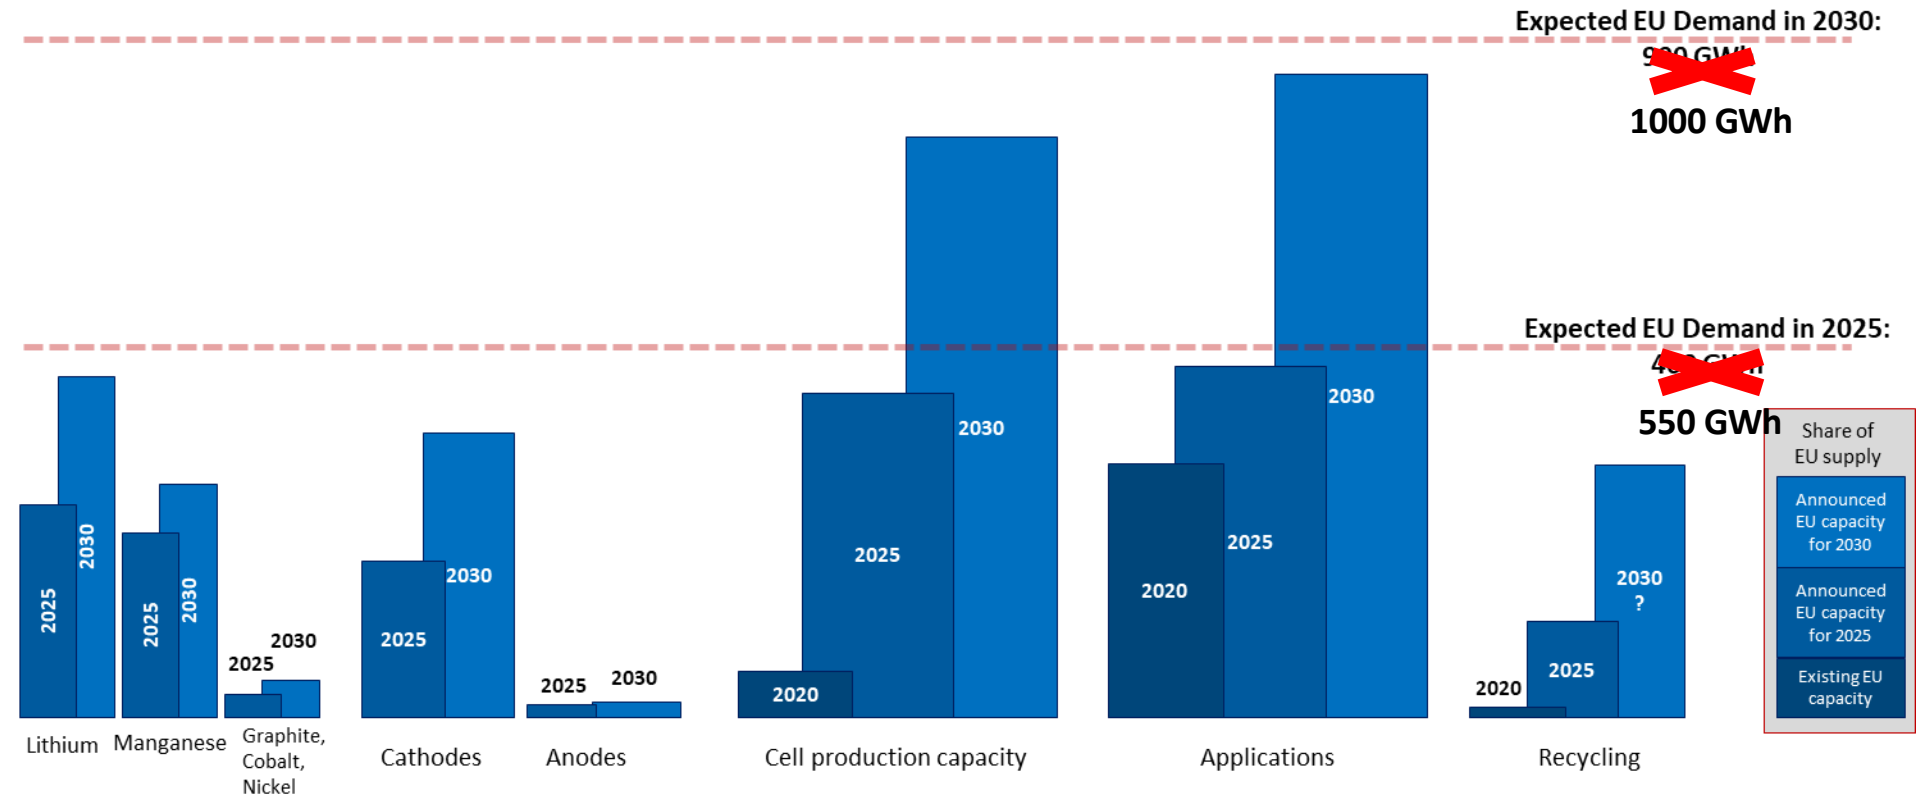

**40+** Financial Institutions

## The European Battery Alliance

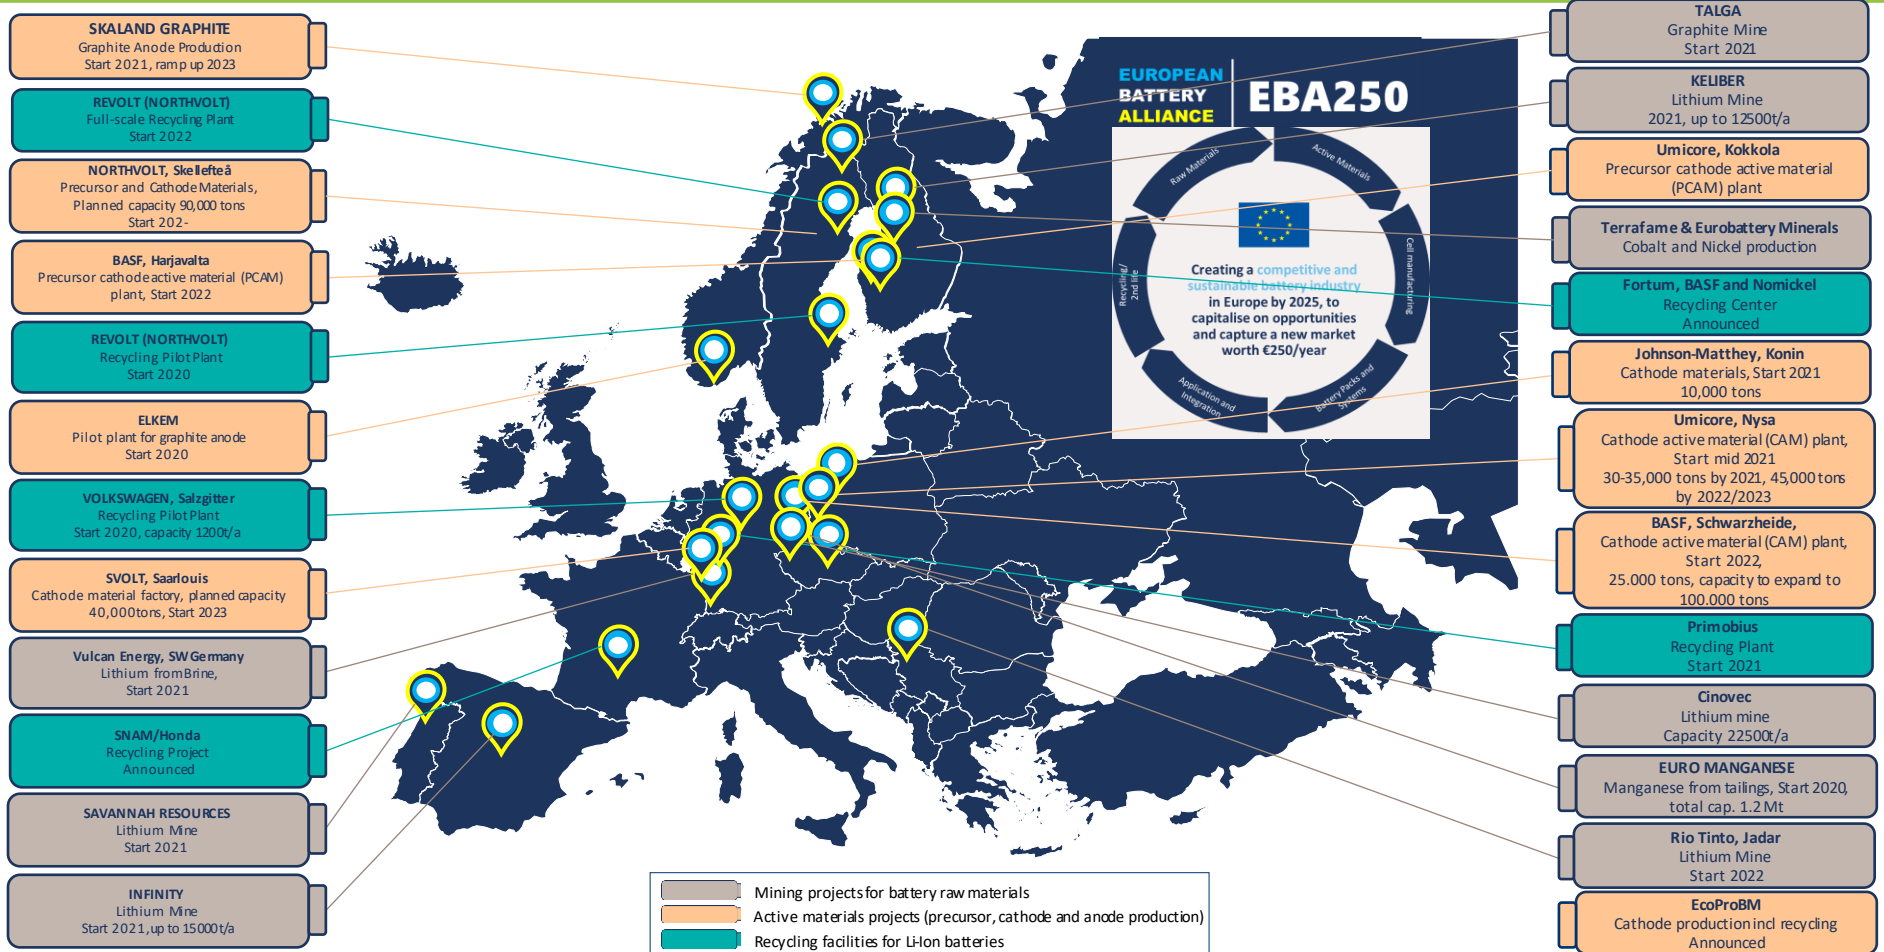

# Ongoing and Planned Li-ion Battery Cell Factories in Europe

# Selection of Battery Materials Projects in Europe (Raw, active materials and recycling)

Mining projects for battery raw materials  
 Active materials projects (precursor, cathode and anode production)  
 Recycling facilities for Li-ion batteries

## Key success factors:

- Unified European Strategy
- Circular and Green Batteries
- Large scale from the beginning
- Strategic Alliances along the value chain
- Attract best skills globally
- Attract public / private / industrial financing

**Europa has started its journey from “The Game is Lost” to “We can become Winners” and the EU Battery Alliance has become the blueprint for other industrial strategies**

EIT InnoEnergy is the innovation engine for sustainable energy across Europe supported by the European Institute of Innovation and Technology.

EIT InnoEnergy's role in the European Battery Alliance is to provide background data, collect and formulate key questions, recommendations and actions.

EIT InnoEnergy also supports the establishment of a European Battery ecosystem by promoting a meeting place for key players along the entire value with our EBA250 Workshops.
